PRESCRIPTION DRUG STEP THERAPY

As currently provided in the Benefit Plan's Prescription Drug Utilization Program, in some cases the Claims Administrator may require the Plan Participant to first try one or more Prescription Drugs to treat a medical condition before the Claims Administrator will cover another Prescription Drug for that condition. For example, if Drug A and Drug B both treat the Plan Participant's medical condition, the Claims Administrator may require the Plan Participant's Physician to prescribe Drug A first. If Drug A does not work for the Plan Participant, then the Claims Administrator will cover a prescription written for Drug B. However, if Your Physician request for a Step B Drug does not meet the necessary criteria to start a Step B Drug without first trying a Step A Drug, or if You choose a Step B Drug included in the Step Therapy program without first trying a Step A alternative, You will be responsible for the full cost of the Drug.
